The consolidated *American Journal of Physiology* (AJP) ranks as one of the most frequently cited publications among all physiology journals listed in the *Journal Citation Index*. Published in two monthly volumes by The American Physiological Society, the consolidated AJP brings you approximately 2,700 articles encompassing over 22,000 pages annually.

The consolidated edition of the AJP provides comprehensive coverage of the latest research published in these important specialty journals:

- **Cell Physiology**
- **Endocrinology and Metabolism**
- **Gastrointestinal and Liver Physiology**
- **Lung Cellular and Molecular Physiology**
- **Heart and Circulatory Physiology**
- **Regulatory, Integrative and Comparative Physiology**
- **Renal Physiology**

As your comprehensive source for the full spectrum of current physiological research at a single low subscription price, the consolidated AJP is an unbeatable value.

SYRACUSE UNIVERSITY
Assistant/Associate Professor
Exercise Science (#026689)

The Department of Exercise Science at Syracuse University invites applications for a tenure-track Assistant/Associate Professor to begin in August 2011. Candidates should hold an earned doctorate in exercise physiology or related discipline; post-doctoral experience is highly preferred.

The successful candidate will be expected to contribute to undergraduate teaching in the undergraduate Health and Exercise Science and Physical Education majors, to teach at the graduate level and to advise MS and PhD student research. The department consists of seven faculty members, 150 undergraduate students and 20 graduate students.

The successful candidate will be expected to develop a solid, extramurally grant funded research program based on a predominantly human-based research focus. We are especially interested in candidates working in the area of physical activity assessment/intervention and obesity, especially in children, and the effect of exercise on chronic diseases. Unique opportunities exist for participation in translational exercise research and interdisciplinary research in collaboration with the SUNY Upstate Medical University and the Institute for Human Performance. The Department of Exercise Science is one of seven academic departments in the School of Education, affording a unique opportunity to engage with ongoing intervention programs that target the Syracuse City School District through the Say Yes to Education initiative, a collaboration of the University, the school district and the Say Yes to Education Foundation.

For a position description and online application instructions, go to www.sujobopps.com, (#026689). Review of applications will begin November 1, and will continue until the position is filled.

Syracuse University is an Affirmative Action/Equal Opportunity Employer.
CALL FOR NOMINATIONS

For the Editorship of the

American Journal of Physiology-Lung Cellular and Molecular Physiology

Nominations are invited for the Editorship of American Journal of Physiology-Lung Cellular and Molecular Physiology to succeed M. Matthay, who will complete his term as Editor on December 31, 2011. The Publications Committee plans to interview candidates in the Spring of 2011.

Applications should be received before January 15, 2011.

Nominations, accompanied by a curriculum vitae, should be sent to the Chair of the Publications Committee:

Hershel Raff, Ph.D.
American Physiological Society
9650 Rockville Pike
Bethesda, MD 20814-3991

CALL FOR NOMINATIONS

For the Chair of the European Editorial Committee of

Physiological Reviews

Nominations are invited for the European Chair of Physiological Reviews to succeed O. H. Petersen, who will complete his term as Chair of the European Editorial Committee on December 31, 2011. The Publications Committee plans to interview candidates in the Spring of 2011.

Applications should be received before January 15, 2011.

Nominations, accompanied by a curriculum vitae, should be sent to the Chair of the Publications Committee:

Hershel Raff, Ph.D.
American Physiological Society
9650 Rockville Pike
Bethesda, MD 20814-3991
THE UNIVERSITY OF UTAH

THE DEPARTMENT OF PHYSICAL THERAPY AT THE UNIVERSITY OF UTAH is seeking a faculty candidate for a tenure-track position to meet the needs of an expanding Department. This is a full-time 9-month position at a rank commensurate with academic and scholarly experience. Primary responsibilities will be to expand upon the current research emphasis within the Department of Physical Therapy and participate in both the PhD and entry-level DPT programs. The position includes responsibilities for teaching, scholarship, academic and research advising, and service. Expertise is sought in one or more of the following areas: geriatrics, neurology, orthopedics, health services delivery, or pediatrics. The successful applicant should have an earned PhD or equivalent post-professional degree. The candidate does not necessarily need to be a physical therapist, though their research and teaching experiences should be directly related to rehabilitation. Preferred candidates may also have postdoctoral experience, a track record of advising graduate students and a record of externally-funded scholarship, or will demonstrate strong potential to develop a fundable line of research.

The Department of Physical Therapy is located within the College of Health, and is part of the University of Utah Health Sciences Center. The Health Sciences Center is the major educational, research and referral facility serving the medical needs of Utah and the Intermountain West. The Center includes the Colleges of Health, Nursing and Pharmacy, the School of Medicine, University Hospitals and Clinics, the Health Sciences Library and related Core Facilities. In addition to in-house facilities, the Department of Physical Therapy is in close proximity to associated research entities at the VA Medical Center, the Center for Advanced Medical Technologies, the Intermountain Shriner’s Hospital, the Huntsman Cancer Institute, and the University Orthopedic Center. The University of Utah is classified as one of 151 Doctoral/Research Universities-Extensive from among 3,941 U.S. institutions and has consistently been ranked amongst the top 25 public research universities in the nation.

The University of Utah is located in Salt Lake City, in the foothills of the majestic Wasatch Range of the Rocky Mountains. There is easy access to eight world-class skiing resorts, as well as hiking, biking, camping, and exploring in nearby canyons and in the spectacular red-rock country of southern Utah. Ten National Parks are within a days driving distance of the University. Salt Lake City also offers professional symphony, ballet, modern dance, opera and theater performances, art galleries, world-class restaurants and professional sports.

The position begins July 1, 2010, yet will remain open until a qualified applicant is identified. Rank and salary are dependent upon experience and qualifications. Individuals interested in the faculty position can contact Sheldon Smith at (801) 581-6696 and submit a curriculum vitae via email to sheldon.smith@hsc.utah.edu. Afterwards, requests for a formal application will be made on a case-by-case basis.

Paul LaStayo, PT, PhD, CHT  
Chair, Physical Therapy Search Committee  
Department of Physical Therapy  
University of Utah  
520 Wakara Way, Suite 302  
Salt Lake City, UT 84108-1290  
Applications will be accepted until the position is filled.

The University of Utah is an Affirmative Action/Equal Opportunity employer and does not discriminate based upon race, national origin, color, religion, sex, age, sexual orientation, gender identity/expression, disability, or status as a Protected Veteran. Upon request, reasonable accommodations in the application process will be provided to individuals with disabilities. To inquire about the University's nondiscrimination policy or to request disability accommodation, please contact: Director, Office of Equal Opportunity and Affirmative Action, 201 S. Presidents Circle, RM 135, (801)581-8365.
Highlighted Topics Special Call for Papers
Journal of Applied Physiology
“Emergent Behavior in Lung Structure and Function.”
Submission deadline: February 1, 2011

The Journal of Applied Physiology is seeking the submission of original research papers on “Emergent behavior in lung structure and function.” The Highlighted Topics series for the April – June 2011 issues will feature invited mini-reviews, a series editorial, and original manuscripts focusing on this topic.

To be eligible for inclusion in this Highlighted Topics series, manuscripts must not require extensive revisions and must be submitted before February 1, 2011. Manuscripts requiring extensive revisions and late submissions will be considered, but may not be reviewed in time to be eligible for publication in the three-month series.

Note to Authors: All manuscripts should be submitted online via eJournalPress, http://jappl.msubmit.net/cgi-bin/main.plex. During the online submission, under the “Keywords, Categories, & Special Section” tab, please choose the correct Highlighted Topics under ‘categories’. In addition, include a note in your cover letter indicating the call for papers to which you are responding.

If you have any questions about this call for papers, you may contact the Editor-in-Chief, the Coordinating Editor for the series, or the editorial assistant.

Coordinating Editor: Dr. Jason Bates (Jason.H.Bates@uvm.edu)
Guest Editor: Dr. Bela Suki (bsuki@bu.edu)
Editor-in-Chief: Dr. Jerome Dempsey (jdempsey@wisc.edu)
Editorial Assistant, Christa Tober (608-263-9799 or cltober@wisc.edu)

Highlighted Topics Special Call for Papers
Journal of Applied Physiology
“Mechanism of beneficial effects of physical activity on atherosclerosis and Coronary Heart Disease”
Submission deadline: May 1, 2011

The Journal of Applied Physiology is seeking the submission of original research papers on “Mechanism of beneficial effects of physical activity on atherosclerosis and Coronary Heart Disease.” The Highlighted Topics series for the July – September 2011 issues will feature invited mini-reviews, a series editorial, and original manuscripts focusing on this topic.

To be eligible for inclusion in this Highlighted Topics series, manuscripts must not require extensive revisions and must be submitted before May 1, 2011. Manuscripts requiring extensive revisions and late submissions will be considered, but may not be reviewed in time to be eligible for publication in the three-month series.

Note to Authors: All manuscripts should be submitted online via eJournalPress, http://jappl.msubmit.net/cgi-bin/main.plex. Guest Editor: Dr. Douglas K. Boeles (BowlesD@missouri.edu)
Editor-in-Chief: Dr. Jerome Dempsey (jdempsey@wisc.edu)
Editorial Assistant, Christa Tober (608-263-9799 or cltober@wisc.edu)
LAB ANIMAL RESEARCH EQUIPMENT

NON INVASIVE BLOOD PRESSURE MONITOR: Measures systolic, diastolic, mean blood pressure as well as heart rate of mice and rats. The system works on the tail cuff method utilizing a sensor cuff and occlusion cuff. Can measure 1 to 8 animals and system includes software.

HUMANE ANIMAL TREADMILL: Accommodates 3 rats or 6 mice. Electric stimulus counts the number of shocks & stops at a user-defined number. Features adjustable speed and inclination. Enclosed models also available for VO2/VO2 measurements.

VENTILATOR: Interchangeable pistons that allow for more accurate ventilation volumes (0.5-100mL). Pistons never require lubrication. The breath rate is adjustable (5-200 BPM) as is the inspiration/expiration ratio (H:1) to 1:H.

CLAMS: Comprehensive Lab Animal Monitoring System, developed in collaboration with the Jackson Laboratory. Can measure up to 11 parameters including VO2/VO2, feeding, drinking, activity, and urine production.

MICROCAPNOGRAPH: Measures end tidal CO2 & N2O in small and large animals (mice, rats, dogs & horses) under anesthesia; features a very small sample rate (5mL/min@100 BPM to 20mL/min@300 BPM). Data is displayed both numerically and graphically on the front panel.

CARDIAC OUTPUT COMPUTER: Measures cardiac output by thermodilution. The system also measures blood pressure & EKG. Suitable for animals ranging in size from mice to horses.
