CONTENTS OF VOLUME 30

SECTION PAGE

2, 8 Transthoracic electrical impedance variations associated with respiration.
S. Kira, Y. Hukushima, S. Kitamura, and A. Ito 820

2 Adaptation to exercise: role of hemoglobin affinity for oxygen and 2,3-diphosphoglycerate.
S. D. Shappell, J. A. Murray, A. J. Bellingham, R. C. Woodson, J. C. Detter, and C. Lenfant 827

2, 6, 11 Prediction of maximal oxygen uptake by a stepwise regression technique.
R. T. Hermiston and J. A. Faulkner 833

2, 6 Exercise O2 debts of dogs at ground level and at altitude with and without β-block.
S. M. Cain 830

1, 2, 9 Increased pulmonary diffusing capacity and elevated cerebrospinal fluid pressure.
R. E. Brashear and R. L. Pamintuan 844

1, 3, 6 Exercise temperature regulation in man during hypohydration and hyperhydration.
J. E. Greenleaf and B. L. Castle 847

2, 6 Maximal oxygen uptake at sea level and at 3,090-m altitude in high school champion runners.
D. B. Dill and W. C. Adams 834

1, 6, 11 Capillary density of skeletal muscle in well-trained and untrained men.
L. Hermansen and M. Wachtlova 850

9, 11 Duration of masseteric silent period in patients with TMJ syndrome.
R. Bessette, B. Bishop, and M. A. Itlohl 864

2 Adherence between nasal and pulmonary resistance in newborn infants.
G. Lacourt and G. Polgar 870

1, 3, 6 Exercise temperature regulation in man during hypohydration and hyperhydration.
J. E. Greenleaf and B. L. Castle 854

1 Measurement of the distribution of cardiac output in unanesthetized rats.
Y. Sasaki and H. N. Wagner, Jr. 887

2, 9 Effect of a steady-state exercise on maximal anaerobic power in man.
R. Margaria, P. E. di Prampero, P. Derenzo, P. Aghemo, and M. Mariani 893

SPECIAL COMMUNICATIONS

6, 8 Frequency-to-voltage converter for recording animal temperatures by radio telemetry.
J. L. Riley 890

1, 6, 8 A new glue holds rigid cup ECG skin electrodes for 24 hr or longer.
W. N. Bloch, Jr., and T. R. Lewis 893

9, 11 A voltage-controlled force generator for calibrating sensitive transducers.
H. G. Minns 895

9, 11 Accurate method for measuring dP/dt with cardiac catheters and external transducers.
H. D. Dear and A. F. Spear 897

2 Interaction between nasal and pulmonary resistance in newborn infants.
P. Siegel and J. R. Atkinson 900

5, 8 Hb affinity for O2 determined by O2-Hb dissociation analyzer and mixing technique.
A. J. Bellingham and C. Lenfant 903

5, 8 An analysis for superimposed biological rhythms: application to FSH and LH in women.
J. Slioka, C. M. Cargille, and G. T. Ross 905

1, 2 Cuvette for continuously measuring blood oxygen tension.
R. W. Fisler 908

1 Use of a new cardiac output computer for human hemodynamic studies.
R. F. Leighton and J. Czekajewski 911

1 Experimental production of supravalvular aortic stenosis in the dog.
W. A. Rogers, S. P. Bishop, and R. L. Hal BK 917

2 An automatic method for chromatographic gas analysis using a helical gas collector.
I. E. Sodal, L. V. Corbin, J. V. Well, and G. F. Filley 921

CORRIGENDA

Volume 29, December 1970

In Fig. 7, upper left-hand corner, the equation should read: Ctot = 3.90 X H2O X 10^4.

Volume 30, March 1971

Page 438: J. Clément and K. P. van de Woestijne. “Resistance or conductance? Compliance or elastance?” Page 438: variance of R’ should read: By definition, the variance s2 of R’ is E(R’ - E’)2 or E(R’ - E’)2 - E(E’). Equation 2 becomes:

s2 = R2 - [E[(AV)2/V]2]

and the variance of 1/R’, AV being 0:

E[(AP)2/R2] - [1 - E[(AP)2/P2]] = E[(AP)2]/R2

or, since ΔV/V ≪ 1,

s2 = R2 - [E[(AV)2/V]2]

Volume 30, May 1971

Page 625: C. Lenfant, J. D. Torrance, and C. Reynafarje. “Shift of the O2-Hb dissociation curve at altitude: mechanism and effect.” Page 627: paragraph beginning on line 7, column 1, should be replaced by: Figure 4 shows that there is a positive relationship existing between 2,3-DPG and plasma pH. The coefficient of regression is highly significant (P < 0.001).

Figure 5 shows the relationship between Measured P50 values...
